THE INSIGHTSTAP STORY

At Insightstap, we help B2B tech and IT service companies **build Go-to-Market engines that run like e-commerce machines**—fast, intelligent, and automated.

We blend AI agents, signal detection, personalized outreach, automation, and analytics into one unified GTM system that does what your SDRs and ad teams alone can't.

Let us show you how it works—step by step.

HOW WE BUILD YOUR GTM ENGINE

1 Spot the Right Buyers

Why spray and pray when you can snipe with precision?

We track real-time buying signals—like **job changes, funding rounds, tech installs,** and **website behavior**—to surface the **exact prospects** who are ready to buy now.

"No more guessing. Just data-backed timing."

2 AI That Does the Outreach

Once we know who, our custom **AI agents do the how**.

They craft hyper-personalized emails, LinkedIn messages, and follow-ups—automatically.

They don't just send messages. They **book meetings, qualify leads, and trigger demo flows.**

"Our AI agents have outperformed human SDRs. Seriously."

3 CRM That Thinks Ahead

Your CRM—HubSpot, Salesforce, or custom—gets smarter.

We plug in lead scoring, lifecycle workflows, and pipeline tracking so your sales and CS teams operate like revenue machines.

"Smart CRMs aren't about reporting—they're about removing bottlenecks."

4 Personalization at Scale

We connect **product usage data, web behavior**, and **sales records** to craft campaigns that actually land.

The result?
Your email and ad copy feel relevant instead of robotic.

"We don't just automate. We contextualize."

5 Ads That Actually Perform

We run LinkedIn, Meta, and Google campaigns that sync with real-time signals from your CRM and site activity.

Every dollar is tracked. Every campaign is tested.
Every touchpoint is connected.

"Good ads are creative. Great ads are timed perfectly."

WHAT WE DO

GTM Strategy & Execution

Build your go-to-market engine with data-backed playbooks, signal-led outreach, and full-funnel automation.

AI Agent & App Development

Bring AI-powered tools and apps to life —whether it's a chatbot, assistant, or full-stack SaaS product.

Signal-Led Lead Gen & Cold Outreach

Leverage job changes, funding alerts, and buyer signals to trigger relevant outreach across LinkedIn and email.

Performance Ads & Demand Gen

Run laser-focused Google, LinkedIn & Meta campaigns that lower CAC and grow your pipeline.

CRM Automation & HubSpot Ops

Streamline sales and marketing workflows, from lead scoring to lifecycle automation and analytics.

BEYOND THE GTM ENGINE:
WE BUILD AI PRODUCTS TOO

Got a product idea?

We build full-stack AI apps, voice bots, and GPT-powered tools—from prototype to production.

We use:

GPT-4o Claude Gemini

and your custom workflows to bring ideas to life—fast.

AI APP & AGENT DEVELOPMENT SERVICES

From Idea to Launch—We Build AI That Works
