OVERVIEW

From AI Idea to Production-Ready Product

Insightstap helps founders, startups, and B2B companies **design, build, and deploy custom AI applications and intelligent agents** that work reliably in production.

This service is led by **Ritesh Osta**, a **Top Rated Fiverr Pro AI Developer**, with multiple **live AI products already in market** — not demos, not experiments.

What we build:
AI apps, AI agents, chatbots, voice assistants, autonomous systems, and full AI SaaS platforms.

What you get:
AI products that ship fast, scale smoothly, and deliver real business value.

WHY MOST AI PROJECTS FAIL

Most AI initiatives break down because:

- They stop at proof-of-concepts
- There's no real architecture planning
- LLMs are used without orchestration
- UX is ignored
- Latency, cost, and reliability are not handled
- No production testing
- Teams lack full-stack AI expertise

Result:

Impressive demos → fragile products → stalled launches.

OUR PHILOSOPHY

AI Engineering, Not Prompt Experiments

We treat AI like software engineering, not content generation.

Our work combines:

- Product design
- Full-stack development
- LLM orchestration
- Agent logic
- Automation pipelines
- Scalable infrastructure

This is how AI products **actually survive production.**

AI PRODUCT PORTFOLIO

OneGPT — Multi-Model AI Chat Platform

Overview:
A unified AI chat interface supporting GPT-4o, Gemini, o1, o3-mini, and Llama, with multi-modal input.

Key Features:

- Multi-model access
- Text, image, PDF, video, audio input
- Image generation
- Unified chat experience

Tech Stack:

- Frontend: Flutter
- Backend: Python, Node.js (Express)
- Real-time: Socket.IO
- Database: MongoDB

Business Value:
Simplifies access to multiple AI models in one platform, improving productivity and user experience.

Elevate Health Lactation Voice AI

Overview:
Voice AI system for OBGYN Practice lactation follow-up calls using Vapi.ai integration.

Key Features:

- AI Lactation Consultant voice agent
- Call scheduling and management
- Patient follow-up automation
- Call recording & transcription
- Voicemail, Fax, SMS modules
- Dashboard for nurses/practice staff

Tech Stack:

- Frontend: Flutter 3.24+ with Material Design
- State Management: Riverpod 2.5+
- Backend: FastAPI with Swagger documentation
- Authentication: Firebase + OAuth (Google, Apple, Microsoft)
- Database: PostgreSQL + Hive (local storage)
- Real-time: WebSocket
- APIs: REST (WebSocket planned for later phases)
- Hosting: Google Cloud Platform

E-Prescription & Clinic Management

Overview:
Comprehensive e-prescription and clinic management platform for UK private healthcare with DigIdentity AES integration for legally compliant electronic signatures.

Core Modules:

- Public Website & Marketing
- Authentication & User Management (DigIdentity OIDC + AES)
- Prescription Management (NHS DM+D integration)

- Patient Management with CSV import
- Clinic Administration (multi-user)
- Token-based Billing & Subscription System
- Pharmacy Dispensing Interface (code-based lookup)
- Reporting & Analytics
- AI Support Bot
- Contact Management

Core Modules:

- Advanced Electronic Signatures (AES) meeting eIDAS Article 26
- NHS DM+D drug database integration
- Repeat prescription system (1-6 repeats)
- Long random prescription IDs (16+ characters)
- Rate limiting for pharmacy lookups (10/minute/IP)
- Multi-Factor Authentication (optional but recommended)

Tech Stack:

- Frontend: React with TypeScript, Material-UI v5
- State Management: Redux Toolkit with RTK Query
- Backend: Appwrite BaaS + FastAPI (Python 3.11+)
- Database: PostgreSQL 15+
- Authentication: Appwrite Auth + DigiIdentity OIDC/AES
- File Storage: Appwrite Storage
- Caching: Redis
- Email: SendGrid
- SMS: Twilio
- Payment: Stripe / PayPal
- Infrastructure: Docker, Nginx
- Monitoring: Prometheus + Grafana

ConnectChat — AI Chatbot + CRM Interface

Overview:
A customizable AI chatbot system for websites with a CRM-style dashboard.

Key Features:

- Website-embedded chatbot
- Custom AI models
- Visitor data capture
- Multi-LLM support
- Admin dashboard

Tech Stack:

- Frontend: React
- Backend: Node.js (Express)
- Database: MongoDB
- AI Models: OpenAI, Gemini

Business Value:
Improves customer engagement and lead capture using AI-driven conversations.

Ava AI — AI Voice Assistant

Overview:
A voice-based AI assistant for customer support and sales calls.

Key Features:

- Inbound & outbound calls
- Intelligent query handling
- 24/7 availability
- Real conversational responses

Tech Stack:

- Frontend: Next.js
- Backend: Node.js, Python
- AI Orchestration: LangChain
- Model: GPT-4o
- Telephony: Twilio

Business Value:
Reduces support load and improves response times through AI-driven voice automation.

WHAT WE BUILD FOR CLIENTS

Custom AI Applications

- GPT-powered web apps
- Internal AI tools
- Multi-model AI platforms
- AI copilots & dashboards

AI Agents & Autonomous Systems

- Research agents
- Browser automation agents
- Task execution agents
- Multi-step decision agents

AI Chatbots

- Website chatbots
- Support bots
- Lead qualification bots
- CRM-connected assistants

AI Voice Agents

- Call handling bots
- Booking assistants
- Sales & support voice agents

End-to-End AI SaaS Platforms

- Multi-tenant architecture
- Authentication & roles
- Billing & usage tracking
- Admin dashboards
- Scalable AI infrastructure

OUR AI DEVELOPMENT STACK

FRONTEND

- React
- Next.js
- Flutter

BACKEND

- Python
- Node.js

AI & ORCHESTRATION

- LangChain

LLMS

- GPT-4o
- Claude

Gemini

Llama

Hugging Face

AUTOMATION

Playwright

Socket.IO

DATABASES

MongoDB

PostgreSQL

HOW WE BUILD

1. Product & Architecture Blueprint

Use-case definition, model strategy, data flow, UX, security.

2. Core Development

Frontend, backend, APIs, AI orchestration.

3. Agent & Automation Layer

Multi-step logic, autonomous workflows, browser/voice pipelines.

4. Testing & Optimization

Latency, cost, accuracy, reliability.

5. Deployment & Scaling

Monitoring, versioning, performance tuning.

WHO THIS IS FOR

- AI startups
- B2B SaaS companies
- Founders building AI products
- Enterprises automating workflows
- Teams replacing manual processes with AI

WHY CHOOSE INSIGHTSTAP?

- Built real AI products already in production
- Led by a Top Rated Fiverr Pro AI Developer
- Full-stack AI engineering capability
- Deep agent & LLM expertise
- Product-first mindset
- Trusted by global startups & B2B teams

We don’t build experiments. We build AI products that ship.

ENGAGEMENT MODELS

- AI MVP Build
- Full AI Product Development
- AI Agents & Automation
- AI Integration into Existing Products

Transform your enterprise sales function with **InsightsTap**. Join the ranks of industry leaders who are embracing the future of **B2B sales**.
